

GENERAL Information

Specifications

Glass

Glass

The standard glass which tops all tables in our pricelist. All glass is made according to government specifications (DD-G-451-C) and may contain defects. These defects are inherent in the manufacturing and are within specification. All glass has a natural green tint, and the tint is more noticeable when the glass is thicker or larger.

Starphire Glass

A clearer (less green) glass that is available. Requires a price quote from EKITTA.

Etched Glass

The standard glass that is sandblasted on one side. The sandblasted side is mounted on the bottom, thus creating an opaque or frosted appearance. Etched glass is quoted in the pricelist.

Tempered Glass

Clear glass that has been manufactured to withstand greater stresses than annealed glass. Although sometimes referred to as "safety glass," it is breakable, but it will break into small blunt fragments. Requires a price quote from EKITTA.

Stone

Granite, marble, and quartz, listed on page 7 are the standard stone options available for table tops. An edge detail option and the type of stone must be selected when specifying. In addition to the stones listed, other marbles and granites are available; please contact EKITTA for availability and prices. EKITTA makes no attempt to guarantee consistency of color or texture of stone from piece to piece. Both marble and granite are organic products; therefore, they vary widely in color and texture. Granite is a very hard and durable stone which is impervious to most stains and requires minimal maintenance.

Quartz Solid Surface is stain resistant, denser than granite, GreenGuard compliant, antibacterial, scratch resistant and requires minimal maintenance.

Marble is hard and smooth, but is not completely impervious to staining and scratching.

Antiqued marble is marble that has been treated to have a distressed surface. It is not recommended for surfaces that will be used for writing or eating.

Honed stone surfaces are duller in appearance than polished stone surfaces and must be sealed. Some stones are available in antiqued or honed surfaces. Pricing for stone with these surfaces is advanced one grade.

Wood

The external wooden parts incorporated in EKITTA interior use products are the highest grade of maple, cherry or oak (where available) and ipe for exterior benches. These woods, like other natural materials, are subject to variation in grain and coloration. No guarantee will be made of an exact match to EKITTA finish samples.

Custom wood finish samples must accompany the purchase order. Orders specifying custom wood finishes will be scheduled for production upon receipt of an approved customer's custom wood sample match. An upcharge of \$125 NET per order will apply for each custom wood finish sample.

Plastic Laminate

Plastic laminate pricing is based on Wilsonart -38 Fine Velvet and -60 Matte finishes. Wilsonart laminates are GREENGUARD INDOOR AIR QUALITY CERTIFIED

Pricing will be determined by the price of the specified laminate, lead time will be based upon the availability of the laminate material. Contact info@ekitta.com for quote.

Painted Metal Finishes

Painted finishes are polyurethane enamel coating with superior durability and excellent impact resistance. Paint finish samples listed are considered standard finishes. All other paint finishes require a price quote from EKITTA.

Aluminum

The metal aluminum is a non-ferrous alloy that is light weight and resistant to corrosion. It can be finished to a natural silvery color or receive an anodized color. Anodizing is an oxidation process that is a permanent and integral part of the aluminum. It is available on limited product, only where noted.

Stainless Steel

The metal stainless steel is an iron-base alloy containing chromium, which contributes to this material's resistance to corrosion. Depending on the addition of minerals to the alloy, stainless steel's tensile strength, toughness, and corrosion resistance can be enhanced. Stainless steel's finish is a natural silvery color that is very durable and easily maintained.
